### Cleanliness is Next to Godliness

by Lee McCall

MaximumYield - USA Edition, May 2009

This handy reference provides the top 10 ways to keep the grow room clean and keep plants happy. Keep these tips handy, apply them regularly and your plants will thank you.

1. Regularly remove physical debris and trash from the grow room area.
2. Perform proper sanitation practices.
3. Ensure proper airflow and humidity levels.
4. Intake points for fresh air exchange should always be filtered.
5. Utilize foliar applications when the lights are off, as a form of treatment against plant attacking insects.
6. Regularly change up pesticide regiments so that insects are unable to build-up immunity.
7. Consider using wetting agents or surfactants to help emulsify oil-based control products.
8. Use neem oil complexes as a natural pesticide for fungal problems.
9. Utilize protective coverings such as plastic tarp or poly to protect the floors and walls from staining or permanent damage.
10. Train yourself to possess clean habits and practices.
